### EFX delivers VFX for *Thoda Pyar Thoda magic*

28 June 2008 06:40 PM

By ANIMATIONXPRESS.COM TEAM

EFX Prasad, one of the largest digital post production studios in India has executed more than 420 VFX shots for Yash Raj Films' *Thoda Pyar Thoda magic* (TPTM), directed and co-produced by Kunal Kohli. Starring Rani Mukerji and Saif Ali Khan in lead roles, the movie loaded with creative VFX shots all set to capture the imagination of the audience.

The VFX for TPTM were supervised by Neil Cunningham from London while a team of more than 60 specialists from EFX Prasad worked on this project. The movie plot called for lots of 3D modeling and animation as the project also involved designing and building the concept of 'Heaven'. The complete 3D cloud environment set was designed and

Various types of 3D models were made in the cloud environment that included cloud sofa and Cloud conference table. Other special features comprise of complete 3D Seasons change sequence, 3D set extensions as well as creating 3D animated characters like dolphins, dinosaur, ninja spiders, sea horses, lobsters, and seagulls. All these critical VFX shots were created and animated to match live-action footage to add intensity to all images and shots in the movie.

Some of the complicated compositing shots involved Geeta's (Rani Mukerji) walk along side Mahatma Gandhi in an old newsreel shot – with his arm around her and Geeta cycling down to earth in a rainbow in-between clouds.

Neil Cunningham added, "This project was a wonderful opportunity for EFX and me, because of the variety of VFX that the film demanded. I knew TPTM would be an interesting project when I realized that we had to design and build heaven entirely in CG. The production team had incredible imaginations, and we were called upon to create images that brought their ideas to life. All this was achieved in record time, and under pressure the EFX guys were able to add creative ideas at every stage. I am extremely impressed and happy with the work done by EFX Prasad."

Kunal Kohli said, "This is the first time that I have tried wide-ranging VFX in my movies. TPTM involved exploring the fantasy world with children. I looked-for some one who will understand my ideas and give me fresh perspectives. I was quite impressed with the VFX work done for the film *Krrish* by EFX Prasad. As my movie involved plenty of effects, I approached EFX Prasad to supplement my ideas. We planned and story boarded the visual effects shots in the movie four to five months before shooting the film. Every detail was carefully evaluated. The film took around 85 days to shoot. What I envisioned is what you can see on the screen. I am satisfied to see the end product well executed by EFX Prasad."

EFX Prasad also provided the Digital Intermediate service for *Thoda Pyar Thoda magic*. Prasad Film Labs made over 500 prints of the movie for national and global distribution from the DI negatives.
